THE AMERICAN DOCUMENTATION INSTITUTE

Index to *American Documentation* Volume 18

The Subject Index to Volume 18 of *American Documentation* has been prepared with the cooperation of the Institute for Scientific Information, 325 Chestnut St., Philadelphia, Pa. It employs a version of the Permuterm™ technique of subject indexing. With this technique a list of terms assigned to an article is computer processed to create every possible permutation of pairs of these terms. The terms are presented in alphabetic order. The user is directed to the first page number of the article as it appeared in *American Documentation*. A code indicates the *type* of article. These are: LTED (letter to editor), BKRV (book review), BRCM (brief communication). No code is shown when the terms lead to a conventional article.

As the Permuterm procedure creates multiple postings under each term, it enables highly specific lookups. To provide generic search capability under a single term, an arrow is printed once for each unique article (⟶). To perform a search under a single term, look up only items with this mark. Ignore the arrow mark whenever the lookup involves a pair of terms.

The Author Index contains the names of all contributors to *American Documentation* Volume 18 and employs the codes described above and used in the Permuterm Subject Index to denote the type of article.

American Documentation gratefully acknowledges the cooperation of the Institute for Scientific Information in the production of this index.
